A fascinating look into the real history of the ancient civilisations, including revelatory new evidence which challenges accepted truths about the history of Egypt.

The mysteries of Ancient Egypt have proved an endless source of fascination to the world. Here, for the first time, international bestselling author Robert Temple seeks to expose the real history of this ancient civilisation. In this fascinating study, Temple unearths revelatory new evidence which challenges accepted truths about the history of Egypt and questions the evidence which most Egyptologists have relied on since 1910. In so doing he has sought to answer the two big questions which have until now been taken for granted:

Where did Egyptian civilisation come from?

And who built the pyramids, and why?

With unprecedented access to lost portions of the valley temple which have long been closed to archaeologists, Temple presents a sensational, reconstructed story of Egypt which exposes a magnitude of previously unseen evidence, including:

- Pinpointing exact locations of unopened royal tombs
- Presenting re-datings of key monuments using a revolutionary new dating technique
- Exposing faked evidence which has been credulously accepted by the Egyptological community
- Revealing who really built the pyramids
- The Great Pyramid could not have been built by King Cheops, nor was it his tomb. But
Robert Temple has discovered the precise location of the real tomb of Cheops, which has never been opened since his burial, and is elsewhere at Giza.

Packed full of fantastic, never-before-seen photographs, which provide hard evidence to support Temple’s claims, Egyptian Dawn opens many paths to the truth in the story of Egypt.

Professor Robert Temple is the author of a number of incisive and provocative books, including the international bestseller, The Sirius Mystery. His books have been translated into a total of 44 languages.

Robert Temple is Visiting Professor of the History and Philosophy of Science at Tsinghua University in Beijing. For many years he was a science writer for the Sunday Times, the Guardian, and a science reporter for Time Life, as well as a frequent reviewer for Nature and profile writer for New Scientist. He has produced, written and presented a documentary for Channel Four and National Geographic channels on his archaeological discoveries in Greece and Italy, and is a Fellow of the Royal Astronomical Society in Britain.

PRAISE FOR ROBERT TEMPLE

‘Robert Temple is a brave man … it is going to be a difficult job for anyone to shoot him down in flames.’ The Times

Robert Temple “is honest with his readers, careful with his sources and writes with zest.”
Daily Telegraph

‘Before you turn off, (Robert Temple) is not the smooth hustler often associated with such theories. His is a work of respectable scholarship.’ Guardian
